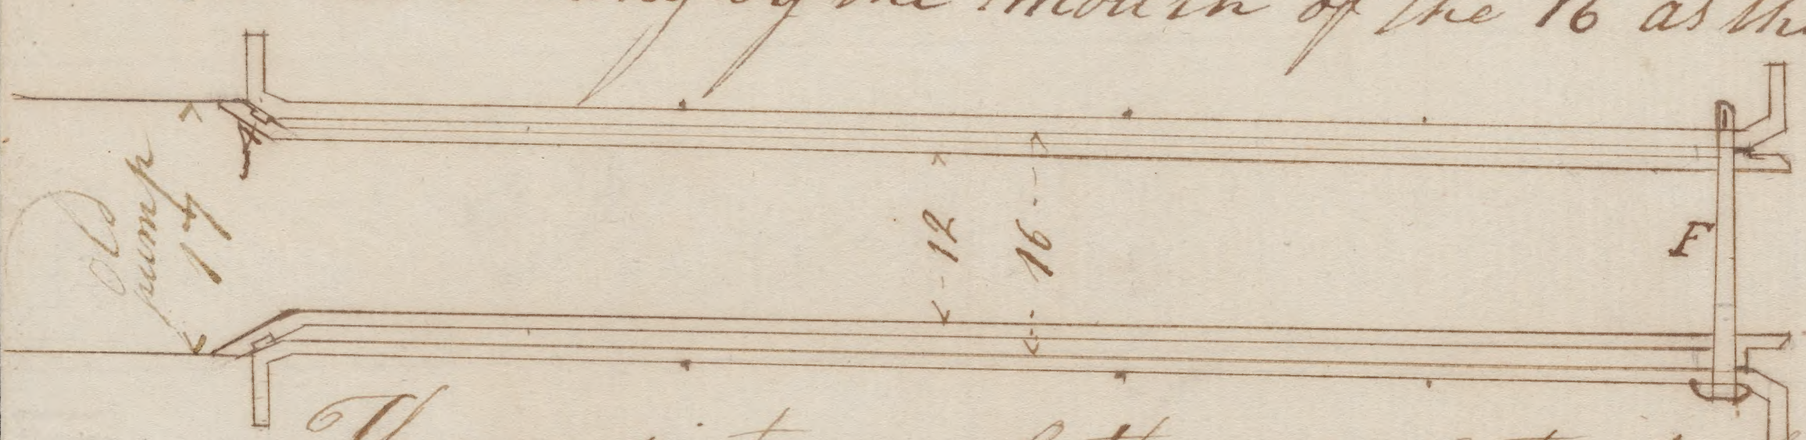
M.r Watt

Sir

It was agreed at Last meeting for new working Barrals to be Order.t for Polgooth Engine as the Old 16 inches that was at W.m Chance is much worne So that ther must be 4 new ons Order.t for 16 inches in Diameter 9.feet 6 Long and 4 for the Summer 12 inches 9 feet 6 Long ——

It was thought practicable to alter the 16 by making the 12 to hang by the mouth of the 16 as this ——



The grove A is to recev Lether F is a Coter to hold Down the 12 —— This I refer to your Judgment and hop you will Order them to be Cast as Sune as posebael

I make the Boyler Steam pipe so by making the end of Boyler to answer the pipe — ther is no materials wanted Except 8 working Barrels and a Steame pipe for the other Boyler Pleas to Let me know what form the other Boyler is to be and the Demensions ——

I am now in good helth and hopes thes will find you in the Same I remain your Serv.t

Will.m Murdock
